

Plumbing & Heating Resolutions for the New Year

Take care of yourself by taking care of your home!
When making your new year's resolutions, don't forget about your plumbing and heating systems.

Just in case you're stumped, we highlighted our Top 5 most important resolutions.

1. Limit Your Water Usage

Cutting back on how much water you use on a daily basis is actually easy. Turning off the water when brushing your teeth or running the dishwasher only when it's full can save water and money. Give it a try!

2. Be Nicer to Your Toilet

Your toilet shouldn't be used as a trash can. Q-Tips, hair, wipes, and other foreign items can be dangerous to your waste pipes! Make a conscious effort to throw these types of items into an actual trash can. If you don't have one in your bathroom, now would be a good time to get one!

3. Protect Your Pipes

Don't get stuck with freezing pipes! Burst pipes are inconvenient and can be extremely expensive to fix. Make sure your pipes are properly insulated. Especially those on exterior walls or in drafty areas.

4. Take Preventative Action

Prevention is always the key to avoiding plumbing or heating disasters. Things like scheduling routine maintenance with our professionals, changing the batteries in your thermostat, or signing up for an annual heating protection plan only take a few minutes of your time and will give you peace of mind.

5. Know When to Raise the "White Flag"

When there's a higher risk of doing more damage than good, hire a plumber. Knowing when to call it quits at DIY projects it can save you precious time and money in the long run.

**We hope our resolutions help you better take care of your home.
Remember, if you need a professional give us a call!**
